Dear Hiring Manager,

I am writing to express my keen interest in the Research Intern position at Voloridge Investment Management. As a dedicated Computer Engineering student at the University of Florida with a passion for systematic trading, I am excited about the opportunity to contribute to your team and further develop my skills in a dynamic and innovative environment.

During my academic career I have developed a strong foundation in data science and machine learning along with software and hardware engineering skills. This unique blend of knowledge has been instrumental in my role as an Assistant Portfolio Manager with AlgoGators, a University-affiliated systematic trading club. In managing divergent strategies within our \$500,000 portfolio, I have not only developed a knack for identifying market trends but also an understanding of applying theoretical concepts in a practical, results-oriented setting. My experience embedding these strategies into an automated system that analyzes daily market data and portfolio risk metrics has been both challenging and rewarding, invoking my passion for this field.

Last Summer, I expanded my technical expertise through an engineering internship focused on embedded systems at a growing autonomous aerial vehicle company. I reported directly to the CEO and my responsibilities included designing a flight control system around power stability and error correcting codes allowing over the wire communications in electrically noisy environments. Working in this fast-paced results driven environment allowed me to further hone my programming, project management, and problem-solving skills, resulting in an offer for future employment with the organization.

What draws me to Voloridge Investment Management is the prospect of engaging in experimental research with extensive datasets. The opportunity to explore such rich resources and contribute to groundbreaking financial strategies is the dynamic learning

experience I am seeking. I am particularly interested in how my background in systematic trading and data-driven decision-making can be applied to Voloridge's innovative approaches in the financial markets.

Thank you for considering my application. I am confident that my blend of academic knowledge, practical experience, and enthusiasm will be a positive contribution to your team. I am eager to pursue an internship with Voloridge, as I believe it will offer an opportunity for both personal and professional growth. I look forward to meeting with you in the future to further discuss my qualifications for a position as a Research Intern at Voloridge this upcoming summer. If you have any questions, please feel free to email me at cole.rottenberg@gmail.com or call me at 407-961-0600.

Sincerely,
Cole Rottenberg
